SYED HASSAN AHMED

GRC ANALYST | IT RISK & COMPLIANCE | CLOUD SECURITY

Karachi, Pakistan | +92 333 2124852 | s.hassanahmed93@gmail.com

shassanahmed.space | LinkedIn | github.com/shassanahmed93-rgb

PROFESSIONAL SUMMARY

GRC Analyst supporting a cloud-based creative and digital marketing environment, with a 10-year background in regulated broadcast media. Experience includes risk assessment, control mapping, policy development, vendor reviews and evidence coordination. AWS Certified Cloud Practitioner with practical GRC case studies and a previously deployed AWS Journal API using Terraform, EKS and OIDC-based CI/CD.

CORE SKILLS

GRC: Risk registers, likelihood/impact scoring, treatment plans, gap assessments, control mapping, third-party risk, policy documentation, audit evidence and corrective-action tracking.
Frameworks: ISO/IEC 27001:2022, ISO 31000, NIST CSF 2.0, NIST RMF, SOC 2; privacy support for GDPR and CCPA.
Cloud & delivery: AWS, IAM, shared responsibility, Terraform, EKS, RDS, Secrets Manager, GitHub Actions, OIDC; Python/Flask and OSCAL portfolio work.

PROFESSIONAL EXPERIENCE

Multi Chaos Media | Michigan, USA

GRC Analyst (Remote) | March 2026 - Present

Cloud-based digital media company delivering animation, website development and PPC advertising services.

- Lead GRC activities for client information, campaign data and cloud-hosted production workflows; maintain scored risks, treatment plans and accountable owners.
- Assess cloud infrastructure, web applications and delivery processes; work with technical teams to prioritize and track security remediation.
- Review customer-database access, least privilege, data classification, encryption requirements and retention practices.
- Perform ISO/IEC 27001:2022, NIST CSF 2.0 and SOC 2 gap assessments; map overlapping controls and support client security questionnaires.
- Maintain access control, incident response, acceptable use and data protection policies; review SaaS vendors, ad platforms and freelancers handling client data.
- Support privacy data mapping and processing records; coordinate evidence, internal reviews and corrective actions, report priorities to leadership and deliver role-relevant awareness guidance.

BOL Network | Karachi, Pakistan

Lead News Producer | September 2019 - Present

- Lead editorial governance and risk-based review for live and recorded broadcasts under legal and regulatory exposure.
- Develop and apply SOPs for production workflows, incident escalation and crisis coverage; coordinate teams and brief senior leadership on emerging risks.
- Coordinate newsroom teams, management and external stakeholders to deliver accurate, standards-compliant information under strict deadlines.

Earlier roles at BOL: Program Manager (July 2017 - September 2019); Producer (December 2016 - July 2017); Associate Producer (September 2016 - November 2016).

Additional experience: Founder & Business Owner, XLO (July 2020 - March 2022); Senior Marketing Executive, Souda Ghar (January - May 2021). Supplier coordination, customer issue handling and business operations.

EDUCATION

MA, Mass Communication / Media Studies | University of Karachi | 2016
BA, Mass Communication / Media Studies | University of Karachi | 2015

SELECTED PROJECTS & CREDENTIALS

Project walkthroughs and supporting artifacts: shassanahmed.space/#projects

GRC case studies use public-source research or synthetic evidence; they are separate from employment responsibilities and do not represent client audit engagements.

Third-Party Risk Assessment

Public-source Notion review for a fictional SaaS buyer: 30 questions, evidence coverage and a critical-question approval gate. Includes a reusable questionnaire, evidence requests and proposed onboarding decision.

AWS-SOC 2 Evidence Mapping

Twelve selected criterion mappings with control procedures, shared responsibilities and evidence requests. Includes offline/read-only collection tooling; live AWS evidence remains uncollected.

Cloud Credential Incident Tabletop

Eight authored injects on a fictional 120-minute clock, with model decisions, a facilitator guide, observer templates and an improvement plan. No actual participant response-time claim.

Cloud Controls Mock Internal Audit

Ten fixture-based workpapers linking criteria, populations, evidence, findings and retests. Two scoped passes, five exceptions and three inconclusive results; eight proposed corrective actions.

Cloud Assurance Lab

Connected eight risks, eight controls and test results to five remediation findings. Built a searchable register, risk heat map, CSV export and executive briefing using synthetic evidence.

Cloud GRC OSCAL Platform

Python/Flask dashboard for synthetic findings, illustrative risk scoring and selected NIST SP 800-53 control references. Added CSV and example OSCAL SSP exports, with pytest coverage.

Enterprise Risk Register & ISO 27001 ISMS Documentation

Fictional manufacturer case study: 75 risks across 13 categories, including 56 cyber risks; 5 x 5 scoring, treatment plans, KRIs and a draft 93-control Annex A mapping. Includes ISMS scope, policies and a privacy gap assessment.

Journal API on AWS

Built and deployed a FastAPI/PostgreSQL API using Terraform, EKS, private RDS, Secrets Manager and OIDC-based CI/CD. Added OpenTelemetry observability; resources were retired after deployment verification.

CERTIFICATIONS & TRAINING

Certifications: AWS Certified Cloud Practitioner (CLF-C02); Empire Certified GRC Analyst (ECGRC); CyberExam Certified GRC Practitioner.
Training: ISO/IEC 27001:2022 Implementation; ISO/IEC 27701 Lead Auditor (training course); SOC 2 Compliance and Readiness; NIST CSF 2.0; PCI DSS 4.0.1; ISC2 GRC Foundations; Google Cybersecurity Professional Certificate; Cisco Junior Cybersecurity Analyst Career.
